## 1. Introduction

The main goal of the **FBudget** project is creating multi-user website/application for family budget management. All information about the family budget is available in one place, giving the whole picture in a way that's easy to understand and take advantage of. All family members can have an access to their budget.

### Features:

- Private family budget;
- Data access configuration;
- Tracking incomes and expenses;
- Family Budget Planner;
- Data Visualization (Reports);
- Data Synchronization.

## 2. User Interface Design and Prototype

Samples below represent user interface for FBudget website.  
This interface supports the following application functions:

- User registration/authentication;
- Application configuration;
- Income/Expense managing;
- Planner configuration;
- Reports.
